RFQ-100322

Engineering Design Services for Lenox Road Complete Street – Phase II

The CID received the following question from prospective proposers:

Question: The scope of services identifies a public open house. Can you provide more details about the level of public engagement desired as part of this process to help inform the public engagement plan?

Answer: The CID anticipates substantial input from the selected firm on the public engagement plan, and therefore the format for the public open house may change somewhat. However, the CID currently envisions an informal public information open house in a virtual format. The informal PIOH will run for approximately 60 minutes, with a 30-minute presentation given mostly by the consultant and a 30-minute question-and-answer session with the consultant and CID PM answering questions submitted by the public in real time.
